Oaksware Corporation

ORACLE CONSULTING GROUP

Our Oracle Consulting Team's mission is to help ensure that our clients maintain a competitive advantage by delivering quality software applications. We provide our services onsite and remotely throughout the U.S. and abroad. We also provide offshore Development.

Our multi-cultural, multi-lingual, and diverse industry experience enables us to offer solutions that are tailored to meet the functional requirements of your business. Oaksware counts with specialized Project Management, Training Management, and Development Management Teams, which meet our customers' business goals and focused target achievements.

Our Oracle core competencies include functional and technical expertise in project management, Oracle training, extensive experience in Oracle Applications' implementations (Financials, HRMS, CRM), custom applications development, data warehousing, business intelligence, database analysis and design, database & tools installations, DBA services, database optimization, networking, high-availability, and enterprise wide back-up solutions. We also specialize in database conversions from legacy databases to Oracle environments, portings, and integration systems services.

Our Technical Architects are experienced in all Microsoft, Unix and DEC VMS operating systems. As well as in the majority networking environments.

Currently, we have some prospects to implement Oracle Applications in the U.S., Peru, Venezuela, Ecuador, and Colombia.

Oracle Services

Oracle Applications Implementation

Oaksware provides complete turnkey implementation and integration services for Oracle CRM, Oracle Financials, and Oracle HRMS applications. Oaksware consultants know the Oracle Applications' functional and technical areas, and have expertise in project scoping, customization, integration, systems architecture design, project management, and multi-site deployment.

Our professionals apply deep industry expertise and unparalleled experience in Oracle solutions to your implementation. We use Oracle methodologies to manage the process involved in the implementation, customization, migration, and deployment of Oracle Applications.

We count with a sufficient number of consultants to be able to manage several projects at the same time.

Oracle Training and Mentoring

Oaksware provides to its customers, Oracle on-site customized training classes, and hands-on seminars, on a variety of Oracle Tools and utilities.

Custom Applications Development

Oaksware's applications development staff are experienced in the use of Oracle development tools and all phases of a system development life cycle, from strategic planning and requirements analysis through modeling, systems development and implementation of complex business data models.

Oaksware's Oracle consulting core development team strength is the proficiency in Oracle Designer tool, and the Oracle Developer, Discoverer, and Oracle database profound know-how.

Oaksware provides Analysis, Design, Modeling and Implementation of large Databases for a variety of

industries. And, because of the use of Oracle software, the solutions we implement are scalable, easy to support, and very cost effective.

Oracle Business Intelligence

Oaksware can help his customers to develop business intelligence systems that allow data to be transformed into competitive tools to target your markets more sharply and gain new insights into your customers.

Our Business Intelligence consultants will help you realize the full potential of your corporate data. By placing emphasis on gathering, storing, accessing and analyzing data, you'll be able to make insightful, capable and informed decisions. Successful applications offer strategic information, and help to get the knowledge required to make the best decisions.

Our BI team has experience with Oracle Data Mart Suite, Oracle Warehouse Builder, and with Oracle Express (Express Server, Express Objects, Express Analyzer, Oracle Financial Analyzer, Oracle Sales Analyzer, Oracle Discoverer, Oracle Reports).

Migrations

Oaksware has a very experienced technical team that provides services in migrations from other platforms (MS SQLServer, MS Access, Sybase, Informix, Ingres) to Oracle. Our services include database and application migrations.

Our migrations are performed using the Oracle Migration tools and their methodology.

DBA/Backup/Recovery

Oaksware provides DBA services, and a Backup & Recovery assessment and planning service, where our experienced consultants can assist you in discovering business, technology and environmental elements that should be considered when creating an effective IT recovery plan.
